

Service | Consultation | Procedure | Fee:

The experience of the last few years has shown me that most of my clients rarely need a comprehensive overall concept with a 3D view or implementation plans drawn up on the computer. Rather, I am usually asked for suggestions and creative proposals; for ideas that bear my typical signature and are also financially feasible. Therefore, I much prefer to offer an individual consultation, which is usually followed by a description and outline in text form. This describes my ideas and thoughts - a virtual tour of how I see your garden in my mind's eye, whether it is a large or even very small garden. I give tips for redesigning or reorganising, give reasons for my suggestions and recommend the materials (stones, plants, lights) or art that I think are suitable for this. If, after this very detailed and detailed conception, you still wish to have a preliminary draft, an execution plan, a bill of quantities or a cost estimate, I can also help you with this.

Most projects can usually be realised after the first outline on my part, a hand sketch and the concept described above in cooperation with an experienced garden landscape builder. In the end, this is usually the shortest and at the same time the cheapest way.

It is a matter of course for me to accompany you during the discussions with the GA-LA-BAUER as well as with the tree-trimmer and also during the subsequent execution work. If the client agrees with my ideas and suggestions, the costs are determined together and further discussions are held with the trades.

The special feature of a garden designed by me is that all measures and designs bear my signature. Every stone used for the garden or the respective project, every tree - in short, every detail - is selected by me personally. This is the only way to ensure that the size and shape of each detail fits the garden and creates a coherent overall picture.

If I am attracted by a project or a garden that needs to be redesigned, and if the chemistry with the client is right, I am happy to help with the realisation. If I am trusted at the same time, the result is usually something unique, a work of art, a garden of a special kind.

However, I also take the liberty of refusing a request or to refer clients to a colleague I trust.

I - Advice on the creative planning of your garden

Many open questions about the design of your garden can be clarified in a personal consultation. On the basis of your templates (site plan, photos, field map) and your very personal wishes, I can help you to develop a concept for your garden with my ideas, my creativity and my expertise.

Let us develop a vision for your garden together and see to what extent your ideas or mine can be realised.

For a first consultation I estimate:

- a consultation in our show garden at Domaine Jaegerthal - charged according to time spent. For a first consultation I usually estimate 3 h (flat rate 555,00 €, each additional hour will be charged according to time spent at 185,00 € plus VAT).

For a first meeting (by appointment), our show garden at Domaine Jaegerthal is the perfect place. Here I can show you my thoughts, visions and in particular the procedure for planning a garden using many examples, and also explain the characters of the respective trees on the existing tree stock. I would be happy to welcome you here in my little gem and take the time to help you create a special garden.

Combine such an appointment with a stay in the beautiful North Alsace, a good meal or a stay in one of our guest houses. You will return home with new ideas, impressions and many inspirations.

II- Home visit

A visit to your home will be charged according to time spent (185,00 € / h). For a first consultation I plan 3 h (flat rate 555,00 €). The journey to and from your home will also be charged according to time spent (185.00 €), + the statutory VAT + travel costs 0.65 €/km (in individual cases, a flat rate for travel costs can also be agreed).

III - creative and conceptual advice - ideas | visions | costs

In the second step, you can commission me to develop an individual overall concept. This includes a creative consultation, a detailed outline of my ideas and an elaborated concept in text form for your garden of a special kind. In such an outline, I will describe how I see and view your future garden and make suggestions about materials (stones, flooring, plants, lights, appropriate art). Individually, depending on the project, a design can also be created in the form of drawings. This service can be provided on a flat-rate basis or according to time spent - plus travel expenses incurred. The respective expenditure can only be determined exactly after the first inspection / the first house visit. The prerequisite for this is a site plan, corridor or building plan provided, which shows the existing buildings, property dimensions,

trees, landscape and garden art

the pipe run in the property and the neighbourly conditions. If no templates are available, the property must be surveyed beforehand. The costs for the surveying and planning office as well as for possible soil analyses are not included in this lump sum.

IV - Follow-up support | realisation | creative project supervision

Of course I am also available for "creative project supervision" during the realisation of your garden. By this I mean the personal supervision of the creative work (modelling, positioning of trees, stones, lights and art). These services as well as the selection of materials in the tree nurseries I trust or the boulders in the quarries and the creative shaping of your trees and garden bonsai can be done with a previously agreed lump sum or according to time spent. Work carried out by subcontractors (surveyor's office, planning office, soil surveyor, garden and landscape builder ... etc.) is to be invoiced directly with these trades.

The invoice amount is due for payment immediately after the house visit. All prices listed here are exclusive of VAT.

For projects abroad, a deposit and the travel expenses incurred are due in advance.

V - Trees, stones and art

Of course I can also advise you on the choice of trees, stones, lighting and art suitable for your garden. For a garden planned by me, I do not leave the choice of these so important elements, especially the choice of solitary trees, to the garden landscaper, but look for and buy each tree individually in the tree nurseries I trust. This is how I find the most beautiful trees for my projects in northern Germany, Italy, Belgium and Japan. Whimsically grown trees, such as garden bonsai or living works of art, are usually pre-designed by me on site in the nurseries. This ensures that I individually and exclusively find the tree for your garden that I already had in my mind's eye during the planning stage.

When choosing trees, I not only pay attention to the shape I want, but also to particularly good quality. Every tree I supply, which is planted by a specialist company under my supervision and then professionally looked after in the follow-up care, is sold with a growth guarantee. The trees I select will be delivered directly from the nursery of my choice to you in the building project to be realised.

Care and design of your garden bonsai and solitary trees

If you wish, my team or myself, in our function as publicly appointed and sworn experts, can also help you with the design of your garden bonsai. Simply get in touch with us.

If the maintenance work is carried out by me personally, the prices listed above apply.

Maintenance work carried out by my team is priced accordingly. Details are available on request.
